Discover Black Stainless

Square, pre-drilled post 9466 and 9467, cover flange 9403, glass clip S7223SB-BK, top mount brackets 9612 and 9614

Discover the eye-catching beauty of black stainless

The black stainless finish is achieved with a PVD (Physical Vapour Deposition) coating, an innovative offering for stainless steel railing components in black.

Once you realize the benefits of the eye-catching and lasting beauty black stainless achieves, you'll say goodbye to powder coating for good.

What Our Customers Say

"I was initially drawn to the look of the black stainless products. The finish is eye-catching and something I knew my clients would like. I would add that the time savings from planning out logistics for powder coating is a significant benefit. That, and I can trust the durability of PVD products."

Build Balusters Your Way: Off-The-Shelf or Drill-to-Suit

Bezdan has an expansive offering of baluster posts for nearly every configuration. Choose pre-drilled posts from 34" to 38" heights for end, center, and corner applications.

Do you want to save installation time? We offer pre-assembled options in both satin brushed and black stainless with glass clips and cover flange. Require a custom fit? Satin brushed stainless posts are available from 34" to 42", so you can cut to size and drill to suit.

- Pre-drilled round and square posts from 34" to 38" heights
- Plain posts are available in 34" to 42" heights

Features:

- Alloy 304 in a beautiful satin brushed finish
- Satin and black stainless options
- Test & Engineering Reports
- Meets ASTM A554/AISI standards
